Angle & Arc Measures

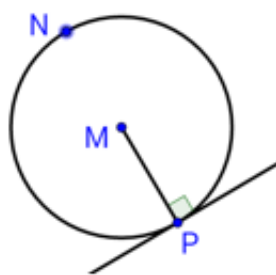

A central angle equals its intercepted arc.

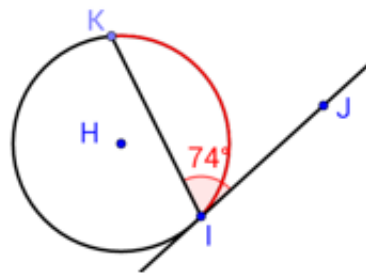

An inscribed angle equals **one-half** its intercepted arc.

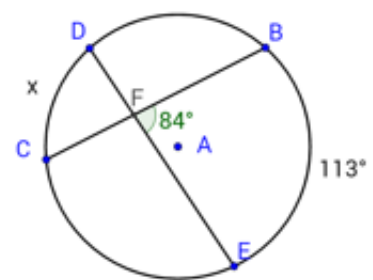

If two inscribed angles intercept the same arc, they are equal.

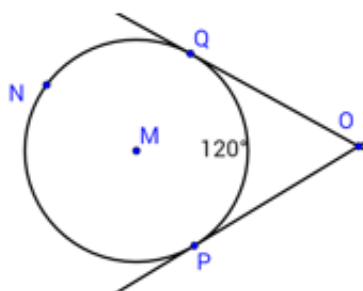

A radius is perpendicular to a tangent at the point of tangency.

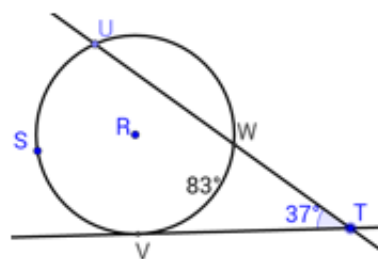

An angle formed by a chord and a tangent (vertex is **on** the circle) is **one-half** its intercepted arc.

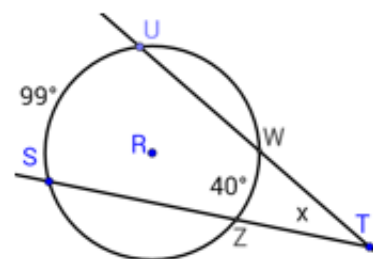

An angle whose vertex is **inside** the circle equals **one-half** the sum of its intercepted arcs.

An angle formed by two tangents is **one-half** the difference of its intercepted arcs.

An angle formed by a secant and a tangent is **one-half** the difference of its intercepted arcs.

An angle formed by two secants is **one-half** the difference of its intercepted arcs.

This allows you to customize the unit test to meet the needs of your students Perhaps you would like to reduce the number of questions or answer choices for an IEP or a 504 plan, or maybe you want to offer a pre-assessment prior to teaching the unit.. Over half of my 67 8th grade on level students (I also teach the Algebra) have never passed a STAAR Math Test.

It is very easy to rearrange the units to fit my pacing guide, and I love how everything is right there waiting for me My kiddos respond really well to the guided notes, and my co-teacher has mentioned how easy it is to find entrance points for some of our struggling students.. From there you can tweak the pacing to meet your students, but all of the prep work has been done for you.. I personally used almost everything in the curriculum and my students grew this year more than I could have imagined Every student but 1 passed the STAAR test this year and this is coming from the same group of students who came to me with less than half passing during 7th grade I just want to say THANK YOU You have a truly made a difference in not only my teaching but many others on my campus as well Haley 8th Grade Math Teacher Bethlyn I am one that looks at the kids that fail and forget to celebrate the kids that succeedIm a little driven.. My district has specific tests that we must use; however, I have used the tests as pretests and additional study guides if my students want to retake an assessment.. I want to say thank you for taking the time to do what you do for kids and teachers across Texas.. If you are debating to purchase this bundle, jump in Best decision I have made in a long time Thank you so much for providing a well thought-out, everything-included bundle Marissa 6th Grade Math Teacher Haley I just wanted to email you and thank you and your team for all you do This year my 8th grade math team and i used your entire curriculum and we saw scores that we have never seen before (93 passing) I work at a low income Title 1 school where majority of my kids came to me hating math and over half did not pass the STAAR test the year before.. We are your town criers in as much as we have exposure to other Middle School teachers at conferences,etc Bethlyn 8th Grade Math Teacher Rosie This curriculum has been a lifesaver for me this school year The units are arranged in a great sequence, allowing students to build on prior knowledge and be prepared for algebra next year.. Lastly, big ideas and essential questions allow you to focus your students on what they can take away from the unit.. Some teachers choose to assign this as homework, while others use this in math stations with small groups.. I seriously believe that because of your materials my students started to actually enjoy math.. You have probably worked in a less-than-ideal situation, where you can relate to the struggles above.. Students are struggling with the concepts because the resources arent engaging Im spending too much time searching for resources to meet the standards. ae05505a44 [The Hookup Game The N Download](#)
